Journal of Fluid Mechanics **Volume 315 25 May 1996**

K. Nakabayashi & O. Kitoh Low Reynolds number fully developed two-dimensional turbulent channel flow with system rotation *page* 1

G. R. Grek, V. V. Kozlov & S. V. Titarenko An experimental study of the influence of riblets on transition 31

D. Skyner A comparison of numerical predictions and experimental measurements of the internal kinematics of a deep-water plunging wave 51

E. Boss, N. Paldor & L. Thompson Stability of a potential vorticity front: from quasi-geostrophy to shallow water 65

S. R. Otto, T. L. Jackson & F. Q. Hu On the spatial evolution of centrifugal instabilities within curved incompressible mixing layers 85

M. Manga Dynamics of drops in branched tubes 105

A. Tumin Receptivity of pipe Poiseuille flow 119

A. M. Balk The suppression of short waves by a train of long waves 139

R. Manasseh Nonlinear behaviour of contained inertia waves 151

R. L. Leboeuf & R. D. Mehta Vortical structure morphology in the initial region of a forced mixing layer: roll-up and pairing 175

K. W. Cassel, F. T. Smith & J. D. A. Walker The onset of instability in unsteady boundary-layer separation 223

M. McIver An example of non-uniqueness in the two-dimensional linear water wave problem 257

C.-Y. Kuo & A. P. Dowling Oscillations of a moderately underexpanded choked jet impinging upon a flat plate 267

J. P. Denier & E. W. Mureithi Weakly nonlinear wave motions in a thermally stratified boundary layer 293

H. Ockendon, J. R. Ockendon & D. D. Waterhouse Multi-mode resonances in fluids 317

R. J. Phillips Dynamic simulation of hydrodynamically interacting spheres in a quiescent second-order fluid 345

J. Feng & D. D. Joseph The motion of a solid sphere suspended by a Newtonian or viscoelastic jet 367

K. Akselvoll & P. Moin Large-eddy simulation of turbulent confined coannular jets 387
